**MN Comprehensive Assessments (MCAs)**  
 The MCA reading, mathematics, and science tests are administered annually to meet federal and state legislative requirements and measure student, school and district performance relative to the Minnesota Academic Standards that specify the skills at each grade level that students should demonstrate proficiently.

	5/7/19	Online	State									X				
	5/7-8/19	Online	State											X		

**The Minnesota Test of Academic Skills (MTAS)**  
 The MTAS is part of the MN assessment program and is an alternate assessment based on alternate achievement standards for students with the most significant cognitive disabilities. It measures reading, mathematics, and science skills that are linked to the general education curriculum. These skills represent high expectations for students with significant cognitive disabilities, but tasks to measure these skills are considerably less difficult than the items on the Minnesota Comprehensive Assessments (MCA).
